

## Adobe Reader – Security Changes

Here are to settings that can help reduce known vulnerabilities in Adobe Acrobat. First turning off JavaScript and then changing the automatic permission to load other applications.

Open Adobe Acrobat, that should be how you currently viewing this document.

Click on “Edit” from the menu bar.

Scroll down and select “Preferences”

Scroll down through the list and highlight “JavaScript”

Un-check “*Enable Acrobat JavaScript*”

Now scroll further down the list until you come to “Trust Manager”

*A* Un-check “*Allow opening of non\_PDF file attachments with external applications*”.
